Installation Instructions For Tile Backer Boards

Timber Stud Walls

For walls made from stud. 10 or 12mm Thermopanel can be used for stud @ 300mm centres or 20mm Thermopanel if

Fix Thermopanel to the studs using screws and Thermopanel washers (MSW36), the maximum spacing between fixings should be 300mm.

600mm centres. Please ensure that all board edges are supported.

Solid Walls

Option 1 Screw Fixing Measure the

Thermopanels and cut to size utilising a sharp knife or saw.

Wall plugs, screws and Thermopanel washers (MSW36) can be used at 300mm spacing to fix to a solid wall

Solid Walls

Option 2 Tile Adhesive

A 5 to 8mm trowel is used to comb flexible tile adhesive over the whole surface of the Thermopanel.

Stagger the Thermopanels brickwork fashion. pushing them firmly onto wall.

Solid Walls

Option 3 Drywall Fixing

Apply Thermopanel Drywall Foam (TPDF) to Thermopanel. firstly around

perimeter, then at (approx.) 300mm centres.

Application to the board laid flat with its end

against the wall is generally the guickest method for application to solid walls.

Allow the foam to cure for 4-5 minutes and then lever the board into position, then press firmly across the whole face of

the board, starting at the top. Ensure the top and all edges receive as much pressure as the rest of the board.

Preparation for Tiles or Plaster Tiling

All joints should be taped using Thermopanel Joint Scrim Tape (IJT90)

with the exception of wet areas where Thermopanel butyl tape (Btape) should be used. The wall can now be tiled. Plastering. Seal the edges of the boards using Thermopanel adhesive/sealant (Thermofix) before applying

the Thermopanel scrim tape (IJT90). Plaster can now be applied.

Floor Fixing Tile Adhesive

Use a 5-8mm trowel to apply a layer of flexible tile adhesive on to the base floor.

Place the Thermopanel down on the adhesive and push firmly down.

Floor Fixing Screws & Washers into Timber

Measure the Thermopanels and cut to size utilising a sharp

knife or saw. Lay Thermopanel in the desired position.

Use screws and Thermopanel washers (MSW36) to fix the boards every 300mm to the wooden subfloor.

If further waterproofing is required, use Thermopanel adhesive / sealant (Thermofix) to seal the joints. Alternatively, in really wet areas use Thermopanel Butyl Tape (Btape)
